A: No, it won't.

Q: Will Keva Battery Enhancer affect the signal strength of my phone?

A: No, certainly you don't need. Just clean the surface of the battery & stick Keva Battery enhancer.

A: No, certainly you don't need. Keva Battery Enhancer?

Q: Do I need to do anything to the appliance before I apply the Keva Battery Enhancer?

A: Keva Battery Enhancer will help your old rechargeable battery to be used for a long time, raise battery's charging ability, recover deteriorated batteries, shorten charge time, less frequent charging, easy to use and top of that you will be helping Mother Earth to save energy and reduce waste.

Q: What are the various features of Keva Battery Enhancer?

Frequently Asked Questions :

rechargeable battery

other electrical & electronic gadgets using video camera, notebook computer, and all computer, digital camera, video recorder, MP3 set, video games, walkie-talkie, palm

Can be used on following items also:

Other Functions and Theory :
Keva Battery Enhancer is processed by adopting Proprietary American technology, which can activate the flowing of Li-ion within the rechargeable battery, carry out fast dissolving of the deposit waste, increase the battery capacity and prolong the life span. Waste matters are stored inside the long-used battery after the repetition of charging & discharging of battery. It is similar as the phenomenon of human blood vessels which are blocked by the waste matter inside the body & the blood flow is slowed down. These waste matters hinder the proper ion-flow & decrease the charging capacity of the battery as a result of which the available calling time is shortened. This is the main cause of power down of the battery.

Keva Battery Enhancer is very effective in its fast recovery of the function of used rechargeable battery. It will be more effective after the lithium battery has been recharged & discharged repeatedly for 1-3 times (when the power is finished & turned off automatically). It will increase the capacity of the used rechargeable battery by 10-85% & if the enhancer is stuck on the new rechargeable battery, it can maintain high battery capacity for a long time & keep a much longer life span.

Increase Your Battery life

On Mobile Phones, Digital Cameras, Palm computers etc.

KEVA BATTERY ENHANCER

Can be used on all electrical & electronic Gadgets using rechargeable battery

- Extends the battery stand by time 0.5-2 times
- Quick charging & saves 50% of charging time
- Extends the service life of rechargeable battery 2 to 3 times
